## Top Skills

Large Language Models (LLM)  
Retrieval-Augmented Generation (RAG)  
LLM Fine Tuning

## Certifications

Machine Learning A-Z: AI, Python & R + Chatgpt Prize [2025]

A deep understanding of deep learning (with Python intro)

Microsoft Power BI Desktop for Business Intelligence

Data Analysis Using Python

Microsoft Excel - Excel from Beginner to Advanced 2025

# Rashid Husain

AI Engineer @ Sosuv Consulting | IIT Dhanbad 24  
Bengaluru, Karnataka, India

## Summary

AI Engineer building production LLM systems, Agentic RAG, and evaluation infrastructure. At Sosuv Consulting, I design AI systems that solve real operational problems for Data Engineering teams, not chatbot demos. My current work includes an Agentic RAG platform for Dagster pipeline troubleshooting, built with LangGraph state machines, hybrid retrieval (BM25 + dense embeddings + Cross-Encoder re-ranking), and automated evaluation using Precision@K and hallucination detection. I also contribute to large-scale Dagster migrations, FastAPI microservices, and cloud-native data platform engineering on AWS, the infrastructure that makes AI systems actually work in production. M.Sc. Mathematics & Computing, IIT Dhanbad. Interested in: Agentic AI · LLM Engineering · RAG & Retrieval · AI Evaluation · Production AI Infrastructure I build AI systems that are measurable, reliable, and useful, not just impressive in demos.

---

## Experience

### Sosuv Consulting

AI Engineer

March 2025 - Present (1 year 6 months)

Bengaluru

- Architected and deployed an internal Agentic RAG platform for troubleshooting Dagster pipelines, enhancing team efficiency.
- Designed LangGraph-based agent workflows, achieving a 30% reduction in unsuccessful retrieval attempts during testing.
- Implemented a hybrid retrieval pipeline, improving context relevance by over 20% compared to previous methods.
- Developed an automated evaluation framework, achieving Precision@5 above 0.80 across Dagster codebase search workloads.

### Outlier

LLM Trainer

January 2025 - March 2025 (3 months)

Hyderabad, Telangana, India

- Implementing Artificial intelligence, Statistics and mathematics to process multi-modal data effectively.
- Utilizing prompt engineering to train large language models at Outlier in a remote setting.

## NullClass

Data Science Intern

July 2024 - December 2024 (6 months)

Hyderabad, Telangana, India

- Developed an age and gender detection project using image processing techniques with a remote team at NullClass.
- Utilized NLP and machine learning algorithms to enhance accuracy and efficiency of the detection system.
- Collaborated with team members to troubleshoot and optimize the model for real-world applications.

## Chegg Inc.

Computer Science Expert

February 2022 - October 2024 (2 years 9 months)

India

- Provided detailed explanations and solutions for computer science problems in Python, SQL, C, DSA, etc.

## Exposys Data Labs

Data Science Intern

May 2023 - June 2023 (2 months)

Dhanbad, Jharkhand, India

- Developed a Machine learning model to optimize company spending and maximize profits.
- Achieved 92% prediction accuracy for company profit based on R&D, administration, and other expenditures.

---

## Education

Indian Institute of Technology (Indian School of Mines), Dhanbad

Master's Degree, Mathematics and Computer Science · (July 2022 - June 2024)

Institute of Science - Banaras Hindu University

Bachelor of Science - BS, Mathematics and Computer Science · (July  
2019 - June 2022)
